SUMMARY

Experienced Frontend Developer, adept at crafting and sustaining responsive web applications leveraging JavaScript and particularly ReactJS. Proficient in collaborating within cross-functional teams, including backend developers, QA engineers, UX designers, and Product and Project managers. Proven ability to contribute to the seamless integration of frontend and backend components for optimal web application performance.

EXPERIENCE

Freelance Frontend Developer

Freelance   **April 2024 - Present**

· Collaborated with clients to translate needs into technical requirements, ensuring satisfaction.

· Managed multiple projects, delivering high-quality results on time.

· Designed intuitive, responsive UIs using HTML, CSS, React, and JavaScript.

· Ensured cross-browser compatibility and optimized front-end performance.

· Integrated RESTful APIs to enhance website functionality and interactivity.

· Conducted thorough testing and debugging, ensuring smooth operation.

· Developed mobile-first, responsive websites for various devices.

· Provided training and support, empowering clients to manage and update their websites.

FRONT- END DEVELOPER

Cargo Fleet   **April 2022 - November 2023**

· Revamped login functionality and design, elevating user security through enhanced input validation and fortified route protection.

· Spearheaded the transition from class components to functional components with hooks, resulting in a notable performance boost and heightened code readability.

· Introduced client-side pagination and executed performance enhancements for optimal user experience.

· Collaborated seamlessly with the back-end team to integrate REST AIs, ensuring efficient data exchange in an Agile environment using JIRA and Trello.
